Datum Filing Systems, Inc.

Figure A: Traditional filing methods with 4Post™ Shelving

Just what the doctor ordered

... and the lawyer, curator, architect, superintendent, warehouse manager ...

Datum understands that you have enough problems at work, storage doesn't need to be one of them. Whether you are a doctor with a growing practice and growing number of files or a country club under construction looking to reduce the floor space required to store golf clubs, Datum has a MobileTrak5® system solution for you. Our process is designed to collaborate with you from concept to completion so the end result is a perfect fit for your wants.

Introducing MobileTrak5®

MobileTrak5® gives you the flexibility you've been waiting for in a storage system. Now you can reduce space requirements by 50% or more while accentuating the interior design and architectural structure. The MobileTrak5® becomes part of the surrounding design rather than looking out of place. Think about it, less space, more capacity, and better aesthetics. . . just what you need and want!

Maximize Usage, Save Space

The traditional method of storage incorporates aisles between every row of shelving (Figure A.) This method was the only choice in a filing system and served its purpose well. Today, modern companies have limited space and more items to store. They can't afford a method that wastes valuable space.

The solution? MobileTrak5®. By eliminating every aisle in the traditional method save one, MobileTrak5® space requirements for shelving are reduced by 50% or more (Figure B.) The result is more space for other vital items like work stations, desks and more.

Figure B: Datum layout saving space shown with MobileTrak5® 3 piece end panels and 4Post™ Shelving

Figure C: Datum layout maximizing storage capacity shown with MobileTrak5® 3 piece end panels and 4Post™ Shelving

Not only does MobileTrak5® save space, it doubles as a system that creates more storage real estate in the same area as your traditional filing systems (Figure C.) Capacity can almost be doubled with the system maximizing valuable space.

Datum Design

by Configura

Renderings were performed using Datum Design by Configura, a powerful design tool provided by Datum.

MobileTrak5® is the standard, high density system by Datum. No matter what application, this system is the perfect unit for storing large amounts of products or files.

The system offers the ability to expand and grow as future storage capacity requirements increase, while utilizing existing floor space. Ideal for companies leasing or renting, the MobileTrak5® features a unique groutless installation that allows the system to be removed with no damage to existing carpet or floors and then relocated and installed at your next location. MobileTrak5® is perfect for growing companies as the system expands with your growth.

MobileTrak5® was used to store massive amounts of archive boxes as well as conventional file folders. This particular system utilizes carriages up to 40' long yet is easily moved with little effort by simply turning the handle.

Save valuable manufacturing space by using MobileTrak5® for loose parts, inventory or bin storage while allowing employees easy access to stored materials.

Versatility & Durability

The high density MobileTrak5® system has been used in museums, art galleries, golf courses, manufacturing facilities as much as it has been used in the professional services industry.

By combining form and function, MobileTrak5®'s versatility and durability allow any application imagined to become a reality.

The **MobileTrak5e** system offers the same features as the standard system with added convenience and security.

Instead of a standard handle the MobileTrak5e features an electronic keypad that allows a user to move the heaviest units of storage with a simple swipe of the finger. The electronic system is perfect for large capacities and frequently accessed items and where security is paramount.

Features

Security Wands

Electronic Keypad

Motor

Motion Sensor

Plug-n-Play Control

Infrared Floor Sweep

Safety

The MobileTrak5e adds additional safety features to protect users. The standard floor sweep stops carriages from moving when the infrared beam is interrupted. In addition, optional overhead entry detection sensors and motion detection sensors can be installed increasing the safety of the system.

Convenience

Simply swipe your finger across the touch pad activates the system to open the desired aisle. This added convenience makes it easy for any person to utilize the storage capacity of MobileTrak5e.

Security

With the MobileTrak5e's integrated, programmable transponder keys, you can assign security privileges to allow and prevent staff from accessing stored materials.

The MobileTrak5e system combines three important features to create a storage solution that is not only aesthetically pleasing, but also functional in the workspace. With a wide selection of designer end panels, flooring and paint customization, the MobileTrak5e is the perfect way to maximize or save valuable space.

There are many options for customizing the MobileTrak5[®] system for your application.

Datum's MobileTrak5[®] and MobileTrak5e systems have the ability to be configured for your exact needs. These are a collection of just a few ways our system becomes your creation.

End Panel Options

The end panels allow for custom laminates, colors and other options to suit the style of the installation location. Match any decor with 7 end panel options to choose from; no end panel, 3 piece steel end panel, 1 or 3 piece melamine radius end panel, 1 or 3 piece laminate radius end panel, or 1 or 3 piece veneer radius end panel.

(MobileTrak5[®] can be ordered with or without end panels)

Custom Handle Options

With 9 combinations of 3 handles and 3 knobs you can custom suit the style to any need or desire.

Ultimate Safety

Aisle locks prevents unwanted movement of carriages while in use.

Recessed Tracks

Datum's innovative groutless system is great for some customers, but others may require a system that is built into the floor.

MobileTrak5® can be installed with recessed tracks eliminating the need for ramps while creating a smooth seamless look that matches the surrounding floor.

Versatile Storage

Utilize any of Datum's shelving product lines or existing shelving to create a custom storage solution.

Aesthetic Focus

Shelves and carriage are color matched with no hardware showing which heightens the aesthetic qualities of the MobileTrak5® system. This combined with 16 standard paints and 13 end panel choices available, you can create a design to match your own style.

(Other paints and laminates are available upon request and may be subject to turnaround time and cost increases)

Tightly Secure

There are a number of security options for the MobileTrak5® system. These include locking aisles, Stak-N-Lok, 4Post™ locking drawers and a TambourDoor™ option.

Versatile Flooring

Standard, non-slip flooring provides a durable surface for high traffic. It is also available unfinished so carpet or tile is easily applied to match your current flooring.

(fire rated and marine grade flooring are available)

Datum's MobileTrak5[®] aesthetic appeal comes without sacrificing durability and functionality. The core foundation of the MobileTrak5[®] is the heavy duty carriage and decking.

Groutless Installation

No permanent attachment to the floor means you can easily relocate, add on to or re-level the system at anytime. Grout installation is available. (required for X-Ray applications)

Keep It Level

With easily accessible leveling capability every 6", the MobileTrak5[®] can be leveled whenever needed to account for shifting and settling floors.

Full Length Drive Shaft

Mechanical assist systems incorporate a full length solid steel drive shaft that spans the carriage's entire length. Additionally, a drive wheel is used at every rail to improve movement of large, heavy systems and eliminates carriage racking.

5" Wheel

Steel wheel with 5" diameter offers effortless movement even with the heaviest loads. Double flanged wheels are used on the outside set of rails for improved tracking and smooth operation.

Heavy Duty Carriage Construction

The heavy duty system is constructed of reinforced 11 and 13 gauge all-steel carriages that handle any size shelving. An anti-tip mechanism is available to provide additional safety.

MobileTrak5® System with ThinStak® Shelving

Professional Offices

Mobile filing is well suited to the specialized needs of healthcare, legal, accounting and other professional offices. The sheer volume of legal, financial and medical record-keeping demanded by regulations can consume so much space that MobileTrak5® is often the only solution for maximum space utilization.

MobileTrak5® System with Stak-N-Lok™ Shelving

Business Records

Remember the “paperless office?” Computers have actually generated more paper and more filing problems for the average American business. MobileTrak5® is the solution by filing more materials in less space, yet improving retrieval.

The applications of the MobileTrak5® system are only limited by the imagination.

From golf clubs to archives, MobileTrak5® is the best solution where space or capacity are problems.

Supplies Storage

MobileTrak5® is flexible enough to accommodate the storage of just about anything—from boxes of office supplies to spare parts and unused equipment. MobileTrak5® also has the ability to lock-up its contents useful for valuable materials, parts or documents.

MobileTrak5® System with 4Post™ Standard Duty Shelving

Archive Storage

The cost of business real estate is forever increasing especially in today's cities. Why pay for square footage on little used archival records? MobileTrak5® can cut the space by 50% or more, yet keep records organized and when needed, readily at hand.

MobileTrak5® System with 4Post™ Heavy Duty Shelving

About Datum

Datum Filing Systems, Inc has been designing and manufacturing filing, storage and office furniture solutions since 1968. Based in Emigsville, Pennsylvania, Datum is a family-owned and operated company that offers a full line of products designed to meet virtually any office furnishing need or storage application.

Dealers across America offer Datum products in addition to planning, moving and installation services. In-stock distributors coast to coast offer prompt delivery.

Our environment has become a subject of increasing importance in the world. It's the responsibility of every person and every enterprise to set a standard for sustainability with better processes and daily operations.

One important display of green-mindedness is our use of powder coating. The system of colorizing our products emits minimal contaminants into the Earth's fragile atmosphere.

Datum currently has standards in place to minimize wasted raw materials. All scrap metal is recycled along with many office supplies. Furthermore, most Datum printed materials are produced on recycled paper.

As more options for environmentally-friendly products and services become available, Datum promises to expand it's dedication to a greener way of conducting business for all our futures.
