

PALLET RACK & WIRE DECK *Systems*

Full Product Line of Pallet Rack & Wire Deck Systems

Wireway Husky is the only RMI certified company to manufacture rack and wire deck together. Wireway Husky also provides technical and engineering support across an extensive product line that uses numerous punch styles and sizes to meet customer needs. As the originator and leader of the Guaranteed 48-Hour Quick Ship program, our customers have come to expect unparalleled service with quality product as standard.

INVINCIBLE® RACK

The Wireway Husky line of Invincible pallet rack features brands synonymous with quality in the pallet rack industry for more than 48 years. Upright frames are available in both 3" x 1-5/8" and 3" x 3" posts with heights up to 46 Ft. The teardrop pattern is an industry standard and accepts most teardrop style beams. Beams feature the patented Bowlock® safety clip. Bowlock® cannot be sprung or removed without first removing the load and requires no special tools. Standard colors are green upright frames with orange beams. Call for other color options.

INVINCIBLE® RACK
Most common in the rack industry. Two teardrop punches side by side on 2" centers. Beams adjustable every 2".

3" x 1-5/8"

3" x 1-5/8" Posts
available in:
14 gauge

3" x 3"

3" x 3" Posts
available in:
14 gauge
13 gauge
12 gauge
11 gauge

LYNX RACK®

Features a Double Slotted Post. 3 inch centers provide quick, easy vertical adjustment of beams. Lynx punch features two angled slots. Beams adjustable every 3". Compatible with similar designs of double slotted rack. Integral safety catch automatically locks into place when beam is properly seated. Standard colors are gray upright frames with yellow beams. Call for other color options.

LYNX RACK®
Features two angled slots on 3" centers. Compatible with similar designs of double slotted rack.

Available 3" x 1-5/8" and 3" x 3"

RELIABLE® RACK

The Wireway Husky line of Reliable pallet rack features brands synonymous with quality in the pallet rack industry for more than 48 years. Upright frames are available in 3" x 3" posts with heights up to 46 Ft. The keystone pattern is an industry standard and accepts most keystone style beams. Standard colors are gray upright frames with gray beams. Call for other color options.

RELIABLE® RACK

Features a single keystone hole in the center of the upright face on a 3" centerline. Beams adjustable every 3". Beams from both sides share the same hole. Compatible with similar designs of keystone rack.

3" x 3"

3" x 3" Posts available in:

- 14 gauge
- 13 gauge
- 12 gauge
- 11 gauge

Subject to order quantity

Prevent Materials from Falling into Aisles!

Wireway Husky's Aisle Shield is an all-steel welded wire, high visibility, flute-stiffened solution to rack aisle protection. Unlike netting, which acts to catch falling product and is very difficult to install, Aisle Shield prevents the product from falling in the first place.

Easy to install with engineered eyebolts, you will receive a product which meets the increasing demands of regulatory agencies for fall protection into pallet rack aisles.

WIRE DECK

Wireway Husky is the only pallet rack manufacturer to produce its own wire deck. This means you get a wire deck engineered to fit right and meet the performance demands of professional material handlers. Wireway Husky's wire deck is the solution for both new and existing pallet rack systems. Numerous designs are available for a variety of capacity and application needs covering all aspects of both manufacturing and distribution. Installs quickly with no tools and is an excellent choice for facilities with sprinkler systems. Meets all fire and safety regulations.

RACK GUARD

Prevent Materials from Falling into Aisles!

Rack Guard is the economical answer to rack safety and the increasing demands of regulatory agencies.

Our panels attach to pallet rack systems using spacer clips. 8-gauge, 2" x 2" square welded steel wire mesh welded to a steel angle frame encloses the rack while still providing inventory visibility. Yellow Finish.

Systems From Wireway Husky

From small to large, Wireway Husky is ready and experienced to provide design assistance and manufacture for all your rack system needs. From catwalks to rack supported mezzanines to full pick modules, we have the products and capabilities to successfully construct your project. Services include assistance with structural design, application efficiency, seismic compliance and permitting.

Products

Accessories

Floor Mount or Bolt-On

Post Protectors
Protects base of upright frames from lift trucks to minimize impact damage.

Invincible Wall Spacer
Secures upright frames to walls for added strength and to help prevent overturning.

Invincible Row Spacers
Ties rows of rack together for proper alignment and added strength.

Reliable or Lynx Rack Wall Spacer

Reliable or Lynx Rack Row Spacer

Flanged

Crossbars
Spans gap between beams to help prevent pallets from falling through.

GENERAL NOTES

1. Beam capacities are for uniformly distributed loads.
2. Beam capacities are based on a deflection specification of beam length/180 or on connector shear capacity, whichever is limiting.
3. Beams over 120" in length should be tied across the middle to prevent beam spread.
4. Beams over 90" that support loose decking should be tied across the middle to prevent beam spread.
5. Please call the factory for any beam spacing on an upright greater than 96".

1. Beam capacities are for uniformly distributed product loads. 2. Beam capacities are based on a deflection specification of beam length/180 or on connector shear capacity, whichever is limiting. 3. Beams over 120" in length should be tied across the middle to prevent beam spread. 4. Beams over 90" that support loose decking should be tied across the middle to prevent beam spread. * Exceptions to Guarantee: Delays due to acts of God, strikes, trucking service interruptions or international shipments.
